

Individuals and Interactions	Human Centric	Frequent Delivery of Working Software	Iterative Progression
		Technical Excellence	Incremental Development
	Value-driven		Short Delivery Cycles
		Simplicity	Evolutionary Requirements
Working Software	Minimal Waste	Empowering Teams of Motivated Individuals	Continuous Feedback
		Constant Development Pace	Refactoring
	Maximal Adaptability	Accommodating Change	Test First Development
Customer Collaboration		Continual Stakeholder Communication and Collaboration	Self-Managing Teams
			Continuous Integration
			Constant Velocity
			Minimal Documentation
			High-bandwidth Communication
			Retrospection
	Continuous Innovation And Learning	Frequent Reflection and Improvement	Client-driven iterations
Responding to Change		Striving For Customer Satisfaction	Appropriate distribution of expertise
			Configuration Management
			Adherence to Standards
