

Individuals and Interactions	Human Centric	Frequent Delivery of Working Software	Iterative Progression
		Technical Excellence	Incremental Development
Working Software	Value-driven	Simplicity	Short Delivery Cycles
			Evolutionary Requirements
Customer Collaboration	Minimal Waste	Empowering Teams of Motivated Individuals	Continuous Feedback
			Refactoring
Responding to Change	Maximal Adaptability	Constant Development Pace	Test First Development
			Self-Managing Teams
	Continuous Innovation And Learning	Accommodating Change	Continuous Integration
			Constant Velocity
		Continual Stakeholder Communication and Collaboration	Minimal Documentation
			High-bandwidth Communication
		Frequent Reflection and Improvement	Retrospection
			Client-driven iterations
		Striving For Customer Satisfaction	Appropriate distribution of expertise
			Configuration Management
			Adherence to Standards
Agile Values	Objectives	Principles	Strategies
